

Description

Formation porcelain tile is an example of sedimentary layers of limestone with a great deal of variation. The atmosphere is set with warm, welcoming earthy tones. The collection presents organic variation with some pieces that are very linear while others are an aggregate and have a shell-based form.

Colors

Finish & Thickness

Matte, Polished | 9.7mm, 9.8mm, 11mm

Finish varies per size and color –
Refer to Color•Size•Finish Matrix

Lead Time

2-3 Weeks
Domestic Inventory

Location

Turkey

Sizes

12"x24"
